## La Quinta Golf Estates LaQuinta, CA

### ACO PORTFOLIO

**Product:**  
**Specifier:**  
**Contractor:**

**Cross Curb Drain**  
**Joseph E. Bonadiman & Associates, San Bernardino, CA**  
**Eagle Paving Company, Inc., Fontana, CA**

Standing water on the residential streets at La Quinta Golf Estates was causing problems for the Home Owner's Association. The ponding, stagnant water was not only unsightly but was causing slippery road conditions. To resolve these concerns, the engineer decided to install a trench drain system to remove the water.

ACO's Cross Curb Drain proved to be an economical solution and with moving parts maintenance would be simpler; removable grates were installed every 100' to provide access to periodically clean out the drains.

Additionally, the Cross Curb Drain is load rated to Class C (1,162 psi) and can withstand cars and small trucks driving through the residential area.
